National RV is celebrating its fortieth year of building quality recreational vehicles. During that time, the company has grown from a small camper manufacturer to one of America’s premiere builders of diesel and gasoline powered class “A” motorhomes. So take a few moments to read the story of how this small company from Southern California shunned the trailer manufacturing techniques of its mass production competitors to focus on building the best motorhomes on the road.

Trust National RV

Every Dolphin begins as an idea. In our Engineering Department, skilled drafters use the latest Computer Aided Design software to model the coach in cyberspace, ensuring a proper design and true fit of every component before a single piece is machined or cut.

INVESTING IN THE FUTURE

Four decades have passed, yet there is still much to learn. Emerging technologies, demographics and customer wants are constantly shaping the idea of what a motorhome should be. National RV’s product development team is driven by customer feedback and the possibilities of emerging technologies. With a history of important innovations and patents already under its belt, National RV continues to research, develop, and invest in the latest manufacturing technologies to ensure ever increasing levels of quality and efficiency.

COMPUTER AIDED DESIGN

In our Engineering Department, skilled drafters use the latest Computer Aided Design software to model the coach in cyberspace, ensuring a proper design and true fit of every component before a single piece is machined or cut.

SINGLE LOCATION

National RV has experienced phenomenal growth over the past forty years but has grown by reinvesting in its own products and facilities in sunny Southern California. Designing and building everything at a single location results in consistent quality across product lines, increased efficiencies and a stable, loyal workforce in the company’s home community. When you buy a National RV you’ll never wonder whether it came from the “good” plant. They’re all built in Perris, and they’re all good.

ENHANCED VISUALS

Visibility is where a thoughtfully planned, well-built motorhome is truly set apart from the typical trailer-like amenities of competitors’ motorhomes.

DOLPHIN LX SPECIAL EDITIONS

Every Dolphin comes in the elegant interior decor and exterior custom paint and graphics packages of the Sterling or Heritage Special Editions.

NO COMPROMISES

National RV chooses to use higher quality methods and components.

FULL FEATURED INSIDE & OUT

Walk around a Dolphin and you’ll find attention to detail that extends to the most remote corners of the coach.

FOUR SEASONS COMFORT

Dolphin’s ingenious basement air conditioning system is the centerpiece of an array of effective, efficient climate control features.

TOTAL ENGINEERING

Rather than the haphazard collection of random parts that other manufacturers cobble together, Dolphin is a complete, engineered system.

JOIN THE FAMILY

Enjoy the benefits of being part of the National RV family.

PERSONALIZE YOUR DOLPHIN

A choice of elegant interior and exterior color combinations.
California Style

Maybe it’s because we’re situated directly between Hollywood and Palm Springs. Maybe it’s because we work hard to build a motorhome that looks and feels like home. Whatever the reason, every National RV motorhome brings a little bit of California sunshine wherever it goes. And every Dolphin motorhome bears the distinctive “California Styling” that is the hallmark of a National RV.

DISTINCTIVE INTERIORS
National RV’s professional interior designers have created a choice of interior décors—Mocha or Cairo for Dolphin and Sterling or Heritage for Dolphin LX—that are befitting a legendary motorhome brand. Throughout the coach, luxurious furnishings and amenities are coordinated in tasteful displays of color and texture. Opulent fabric choices (see back page) are complemented by a variety of beautiful cabinetry wood choices. Designer light fixtures, hardware and floor coverings complete each inviting interior.

FACTORY TOUR CONTINUED
Putting Technology to Work
Throughout the plant, high tech equipment is used to turn engineered plans into precisely milled components. National RV has invested heavily in the latest manufacturing technologies to ensure consistent quality as well as to maximize manufacturing efficiencies.

A HIGHLY SKILLED WORKFORCE
In today’s manufacturing environment, it takes skills to remain competitive. National RV has invested heavily in the latest manufacturing technologies to ensure consistent quality as well as to maximize manufacturing efficiencies.

IN-HOUSE MANUFACTURING
National RV strives to build as many of the coach components as possible in-house. From ABS plastic thermo-forming to fiberglass to wiring harnesses, National RV is a manufacturer, not merely an assembler. In-house manufacturing enables National RV to closely monitor quality at every stage of manufacturing. Another benefit is that lower costs, as only one company is trying to make a profit on the same component. This is one way in which National RV is able to pack more features—and higher quality—into motorhomes than similarly priced models from competing motorhome “assemblers.”

STYLISH EXTERIORS
Dolphin sports sleekly contoured, molded fiberglass compartment doors, fenders and front and rear caps that lend it a distinctive, sculpted look—setting it apart from the boxy, flat surfaces and hard corners of typical motorhomes.

The gleaming high gloss gelcoat fiberglass is complemented with stylish, UV-resistant vinyl graphics in a choice of attractive color palettes.

Check the list of product differences below to determine which Dolphin is perfect for you!

• Interior décors: Cairo, Mocha
• Exterior graphics: custom vinyl in blue or brown and tan palettes
• Designer vinyl flooring in kitchen, hall and bath area
• Chrome electric horns optional
• Multi-disc CD changer optional
• 8 cu. ft. double door refrigerator standard; 10 or 12 cu. ft. refrigerator with ice maker optional
• RCA® 19” TV in bedroom
• Home theater package with DVD and 5-speaker theater sound optional
• Soft touch OptimaLeather® cockpit seating optional
• Fabric clad swivel recliner standard; OptimaLeather® swivel recliner optional
• Maple cabinets and paneling are standard with all interior décors; Cherry is optional
• Optional dining table/cabinet includes two low-back wooden chairs

• Interior décors: Sterling, Heritage
• Exterior graphics: custom paint and vinyl in Sterling or Heritage palettes
• Ceramic tile flooring with inlaid tile accents in kitchen, hall and bath area
• Chrome electric horns STANDARD
• Multi-disc CD changer STANDARD
• 10 cu. ft. refrigerator with ice maker STANDARD; 12 cu. ft. refrigerator with ice maker optional
• RCA® 20” flat screen TV in bedroom
• Home theater package with DVD and 5-speaker theater sound STANDARD
• Soft touch OptimaLeather® cockpit seating STANDARD
• Soft touch OptimaLeather® Euro-recliner with ottoman STANDARD
• Maple cabinets and paneling standard; Cherry optional on Heritage package; Walnut optional on Sterling package
• Optional dining table/cabinet includes two high-back wooden chairs
• Optional 2,000 watt inverter/converter with remote on/off switch and two additional 6V deep cycle house batteries
**Enhanced Livability**

Many gasoline motorhomes are built by companies that specialize in building inexpensive travel trailers— and their expertise in using cheaper materials and methods is evident in their motorhomes. National RV, on the other hand, was built on designing and manufacturing motorhomes for the RV enthusiast. This fundamental difference in design and manufacturing philosophy is what sets Dolphin apart from the competition, and yields a level of quality, comfort and livability that other motorhomes just can’t match.

**Spacious Floorplans**

All Dolphin floorplans feature double or triple slide-outs to pack maximum living space into a coach size that’s easy to drive and park. And wherever you look, every available space is thoughtfully utilized for extra storage or convenient location of coach components.

**That’s Entertainment!**

Whether you’re over-nighting in town or in the boonies, Dolphin’s wide array of entertainment features will keep you tuned in and connected. A huge 27” flat screen TV is placed in the cabinetry above the cockpit area for comfortable viewing from anywhere in the living area. A DVD player, cable TV hookups and an optional satellite dish expand your entertainment possibilities. In the bedroom, enjoy Dolphin’s 19” TV or Dolphin LX’s 20” flat screen TV, both with front-mounted A/V jacks. An available patio entertainment package features a 19” TV and AM/FM/CD stereo on a swivel slide-out mount in an exterior compartment. All Dolphins come pre-wired for a King-Dome® automatic satellite dish, and the dish itself is available as an option.

**Factory Tour Continued**

**Cold Hard Steel**

All of the structural components of the motorhome—subfloor structure, sidewalls, floors, bulkhead and the arched roof—are fabricated from steel. Competitors may use aluminum, wood or other materials to save costs, but none are as strong as cold hard steel.

**Smart Use of Space**

Take a look around a Dolphin motorhome and you’ll discover that no space is wasted. Wherever possible, there are convenient and abundant storage spaces, nooks and recesses. Yet, the coach interior remains fresh, open and livable—never cluttered. Making a coach seem bigger on the inside than it looks from the outside is one of our greatest skills. The intelligent use of space can only be learned through decades of motorhome refinement, and that’s why National RV is so good at it.

**Superior Cabinet Construction**

Take a close look at the cabinetry inside a Dolphin motorhome. You’ll find many thoughtful details that set Dolphin apart.

- Carpet lined kitchen cabinets reduce noise and protect your pots and pans during transit.
- Solid hardwood raised panel or flat panel cabinet doors and drawer fronts provide long-lasting beauty and rigidity.
- Telestrut hardware on upward opening overhead cabinet doors conveniently holds them open, then holds them in their positive catches when closed.
- Storage space everywhere you look, such as a convenient vertical pull-out pantry and huge storage areas under the dinette seats with convenient slide-out bins on Dolphin LX!
- Superior fit and finish with tight cabinet-to-wall fit; compare to large gaps covered with gimp molding on competitors’ motorhomes—there is no gimp molding in a Dolphin!

**The Patented Duraframe™**

In the chassis shop, the patented Duraframe™ all-steel subfloor system is fabricated on precision assembly jigs. Fabricated from carefully formed steel components, the Duraframe™ is welded at every joint to provide unyielding strength over the long haul. The finished Duraframe substructure is carefully lowered onto the motorhome chassis then the two are welded together to form a permanent, super-strong structure. Next, a generous coat of rust-inhibiting paint is applied to the entire assembly before it enters the main assembly line.
Every Dolphin LX motorhome is a Special Edition. Each is a testament to impeccable taste and a fine example of the art of motorhome design, from custom exterior paint and vinyl graphics to opulently designed interiors and other special amenities.

**STERLING EDITION**

An etched stainless steel plaque announces that you are entering the fabulous Sterling Edition. Inside, gleaming metal sets the tone, with fine stainless steel appliances and fixtures throughout. The brushed metal meets with fine Corian® countertops and rich maple cabinetry (you may also choose walnut). Throughout each Sterling Edition, carefully chosen fabrics cover the furniture, bedding and window treatments in stately elegance. Hand laid ceramic tile flooring with accent inlays hints of long lasting beauty that is found throughout this fine motorhome.

**HERITAGE EDITION**

The Heritage Edition is an eclectic mix of simple values and sophisticated tastes. Richly patterned textiles and soft-touch OptimalLeather® denote elegance and comfort. Fine grained maple or cherry wood cabinets complement the rich fabrics with contemporary charm. Premium Corian® with accent edge moldings cover countertops in the living, kitchen and bath areas. The hand-laid ceramic tile flooring with accent inlays hints of long lasting beauty that is found throughout this fine motorhome.

While you and your guests will enjoy the refinements of the Sterling and Heritage Edition interiors, your Dolphin LX will certainly stand out on the highways and in parks due to an elegant custom paint and vinyl graphics package. Lustrous top-quality paint is professionally applied in National RV’s state-of-the-art paint facilities. Wherever you go, the custom exterior graphics will announce your arrival in style.

In another part of the plant, cabinetmakers are busy crafting the wooden fixtures to be placed inside the coach. Computer Aided Design (CAD) provides precisely fit components, then skilled craftsmen bring them together into a sturdy, elegant finished product.

**ASSEMBLY LINE**

Once it arrives on the assembly line from the chassis shop, the building of the coach “house” begins. The floor is laid, cabinets set into place, and all wiring and plumbing routed.

**TUBULAR STEEL COACH BODY FRAME**

In the coach body shop, all coach body components—sidewalls, floor and roofs—are constructed with frames of tubular steel. Here is where precision pays off, as a properly fabricated wall frame will ensure a light coach body structure over the long haul.
No Compromises

National RV never compromises on quality. While other manufacturers "build 'em cheap" to get the initial sale, we believe that building high quality into even our modestly priced motorhomes is an investment in the future.

Dolphin's higher quality standards pay off in retained value and high resale value. When you're ready to trade your Dolphin in after many years of faithful service, you'll be thankful that National RV went the extra mile. And that's why so many Dolphin owners are repeat buyers. Some have been driving Dolphins for decades!

Genuine Corian*

National RV proudly uses only genuine Corian® solid surface materials on every Dolphin kitchen countertop. It's the best countertop you can build into a motorhome—no other material can compare for beauty, performance and durability. At National RV, we don't cut corners like our competitors by using cheaper laminates or imitation Corian®.

Culinary Amenities

Cooking in Dolphin's well appointed kitchen is a delight. The standard GE® SpaceSaver® convection microwave oven and high output 3-burner cooktop (or optional 21" cooktop with range/oven) make quick work of any meal. Dolphin's and high output 3-burner cooktop (or optional 21" cooktop with range/oven) make quick work of any meal. Dolphin's insertion of welded tubular steel for superior strength; carries a lifetime warranty.

Kustom-Fit® Seating

For comfort that lasts, no seat beats Kustom-Fit®. Built especially for National RV in our color coordinated fabrics, this cockpit and living area seating exceeds the comfort and quality of furniture in much more expensive "highline" motorhomes. With Kustom-Fits exclusive cold poured foam and welded steel frame, these seats will provide driving and relaxation comfort for many years to come.

Cold Poured Seat Foam Has a 10 Year Warranty!

Each cushion is formed as a single piece, molded in the correct shape. Competitors’ seats are pieced together from blocks of foam which can come unglued and fall apart.

Steel Frame

Constructed of welded tubular steel for superior strength; carries a lifetime warranty.

Residential Quality Drawer Construction

Accuride® steel ball bearing drawer glides provide 45 lbs. of smooth operating drawer capacity; compare that to competitors' 7 lb. drawer capacity using plastic drawer glides. These drawer glides are constructed using the time-honored dovetail joint method, not staples. Each drawer is finished with a solid hardwood drawer front for lasting beauty and structural integrity.

50 Amp Service & Cord

Compared to competitors' 30 Amp service, Dolphin’s 50 Amp solid state converter and charger and 680 watt inverter provide plenty of power for comfortable living. Dolphin LX can be upgraded with a powerful 2,000 watt inverter/converter, remote switch and two extra house batteries.

Wall Switches for Ceiling Lights

Centrally located wall switches make turning ceiling lights on or off more convenient.

Electrical System

Control of Dolphin's advanced house electrical system is at your fingertips with an ingenious new breaker panel conveniently located inside the coach.

Omn® Marquis Generator

The reliable ultra-quiet Omn® generator provides 7.0 kW of power no matter how far you are from civilization.

Resettable Breakers

Control of Dolphin's advanced house electrical system is at your fingertips with an ingenious new breaker panel conveniently located inside the coach.

Factory Tour Continued

A Cocoon of Insulation

The entire coach is literally surrounded in high density EPS block foam insulation. Each piece is precisely cut to fit between the members of the tubular steel frame then laminated into place. This insulation will never settle or sag like fiberglass blanket insulation.

Vacuum Lamination

A coach body panels are vacuum laminated for unsurpassed strength and durability. This process uses advanced adhesives and vacuum to bond the various input components into a single, inseparable unit.

Advanced Industrial Adhesives

National RV's laminating processes uses specialty formulated adhesives to permanently bond the components together into a single, inseparable piece. Computer controlled extruders precisely meter the adhesive on to the workpiece between each layer of the assembly. As the extruder passes, a fine mist of water is emitted over the adhesive as a catalyst. From this point, skilled workmen move swiftly to complete the assembly and move it into the vacuum table before the adhesive begins to cure.
FULL FEATURED INSIDE & OUT!

Walk around a Dolphin and you’ll discover an uncommon attention to detail even in the most remote corners of the motorhome. On the roof, find a seamless fiberglass roof skin. Open a storage compartment door and look through all the way to the other side. Run a hand along the sleek, molded fiberglass body panels and feel the quality that sets Dolphin apart.

FULL GELCOAT FIBERGLASS EXTERIOR

Every Dolphin motorhome is completely surrounded by gelcoat fiberglass—just like a boat—for long lasting quality, performance and great looks. The sidewalls, full front and rear caps, compartment doors, and even the roof all have exterior surfaces made of gleaming, durable gelcoat fiberglass. Dolphin is the only motorhome in its class that has it, while others choose to cut costs by using plastic, rubber and other cheaper materials.

LEVELING JACKS

Quickly level the coach from the comfort of the driver’s seat. Some motorhomes use only 3 jacks to cut costs but Dolphin features 4 leveling jacks—one on each corner—for a firm, stable living area.

FLUSH SLIDE-OUTS

Look down the sides of other motorhomes and you’ll see unsightly, high-drag protrusions at the slide-out seams. Dolphin’s slide-outs use an ingenious double bulb sealing system to provide a flush surface when closed and a watertight seal at all times.

CAVERNOUS BASEMENT STORAGE BAYS

National RV’s patented Duraframe® all-steel subfloor system makes huge pass-through basement storage bays possible. The Duraframe® provides unmatched coach support through a steel truss framework that is engineered to provide both strength and rigidity to the coach. The design of the Duraframe® also maximizes basement storage volume. Thick tubular steel risers lift the coach floor above the chassis frame rails for even more space and to provide pass-through functionality.

96” DRIVING SPACE

Dolphin’s contoured fiberglass lower skirt effectively creates a 96” (standard width) driving space for a coach that boasts all of the living space of a 102” wide body motorhome. This narrower width close to the road makes it easier to drive and maneuver through parking lots and tight spaces without draining curls and other obstructions with the coach’s compartment doors and lower body skirt.

EASY UTILITIES ACCESS

Few motorhomes can match the functionality and convenience found in Dolphin’s utilities compartment:

- Clearly labeled, easy to reach valves
- Black tank rinse system
- Pressurized water fill with regulator
- Inlet-to-pump for using non-pressurized fresh water sources and for winterizing
- Heated and insulated compartment
- Water heater bypass valve

96” DRIVING SPACE

96” DRIVING SPACE

IT’S STARTING TO LOOK LIKE A MOTORHOME

By the time the sidewall is set into place on a National RV motorhome, many man-hours as well as the best materials and methods have already contributed to creating the strongest and all around best-performing motorhome sidewalls available. National RV’s unique method for attaching the sidewall panels no shear forces on the fasteners. Rather, the weight of the sidewall rests upon a sturdy ledge of steel. Screws are used to hold the wall laterally to the edge of the coach floor, but do not bear the weight of the sidewall and roof assemblies.
Four Seasons Comfort

For 2004, National RV completely rewrote the book on motorhome climate control. From its unmatched envelope of insulation to ducted heat to the awesome new basement air conditioning system, the new Dolphin provides true Four Seasons Comfort.

A COCOON OF INSULATION

Highly efficient EPS block foam insulation is laminated right into every coach body component—the roof, sidewalls, floor, even the basement. It literally surrounds the entire coach. In the ceiling, an ingenious system of interlocking honeycomb foam blocks traps pockets of air (nature’s most efficient insulator) in an impervious thermal barrier that is nearly 6” thick! Insulated dual pane windows are standard equipment and come with tinted safety glass for further thermal and UV protection.

BASEMENT MOUNTED HEATING AND COOLING

Using the powerful new Coleman® basement air conditioner and heat pump combined with National RV’s famous dual in-ceiling cold air ducts, the new Dolphin achieves true residential style circulating conditioned air. The Coleman® unit features dual compressors which work together for optimum cooling efficiency—the second unit comes online only when needed. National RV’s unique rear output duct works in concert with the ceiling vents and intake registers mounted near the floor to provide truly circular airflow for consistent, even climate control. When fall comes, the Coleman® basement unit goes into heat pump mode to provide efficient whole-house warming.

HEAT AND VENTILATION

As outside temperatures continue to drop, Dolphin’s automated climate control system switches from the basement heat pump unit to the propane-fired 35,000 BTU ducted furnace. On larger models, a second furnace keeps the entire coach cozy from end to end. Dolphin’s full array of roof vents—including a thermostat controlled Fan-Tastic® Vent with air freshener—keeps fresh air circulating throughout.

BASEMENT MOUNTED HEATING AND COOLING

Heat and ventilation systems for maintenance.

THE CHASSIS THAT STARTED A REVOLUTION!

The Workhorse W-22 chassis revolutionized the way we think about gasoline motorhomes. With its brawny stance, unmatched horsepower and Herculean carrying capacity, the W-series made it possible for gasoline motorhomes to compete with diesels in many aspects of size, performance and luxury. As an integral component of the Duraframe Chassis System, Dolphin’s Workhorse W-series chassis provides strength and performance you must drive to appreciate.

HEAVY DUTY FRAME RAILS

Frame rails are made of 50,000 psi steel, a quarter inch thick and 9 ¾” high. A section modulus of 10.13 cu. in. surpasses that of any other gas motorhome chassis, and even some diesels.

GM VORTEC 8100 ENGINE

The largest, most powerful gas RV engine ever built.

• B. L. 1/46 CID
• 340 hp @ 4200 rpm
• Torque: 435 lb.-ft. @ 3200

STABIL-RISE FRONT SUSPENSION

• New technology two-leaf panoramic springs provide an incredibly soft ride and excellent handling.
• Unique “Like-Air™” auxiliary springs control deflection of the panoramic main springs for a soft, compliant ride.
• Patented integral stabilizer bar minimizes body roll for greater control in turns.
• Premium custom-tuned shock absorbers reduce body shake and decrease chassis vibration for greater control and comfort.

 chorus Mixed 118 to 178

THE END
THE DURAFRAME® CHASSIS SYSTEM
The Duraframe® Chassis System is a marriage of National RV’s patented Duraframe® technology and select motorhome chassis from leading manufacturers. The Duraframe® Chassis System is specifically engineered to provide the optimum performance, strength, durability, ride quality and basement storage possible.

Rigidly fabricated of welded tube and sheet steel, the Duraframe® Chassis System provides all of the coach strength necessary to carry the load over the long haul. Other manufacturers rely on placing stresses on the coach body—the sideways, roof and floor. This can lead to squeaks and rattles as well as overall loosening and weakening of the coach’s structural integrity. In a Dolphin motorhome, the Duraframe® Chassis System bears these stresses, allowing the coach body and all of its components to remain as tight and quiet as possible.

FUSION FLOOR SLIDE MECHANISM
Flush-floor technology provides residential livability. Precision rock and pinion slide mechanisms are attached directly to the Duraframe® for superior support.

STEEL OUTRIGGERS
The Duraframe® Chassis System uses rigid sheet steel outriggers to provide uniform coach support from the center to the edges. Truss-like arrangement of outriggers and other steel members provides unmatched strength and rigidity to the overall motorhome.

ALL STEEL BULKHEAD
Combined with the tubular steel cagelike frames of the sidewalls and roof, the driver and passenger are surrounded by a safety barrier of cold hard steel. Compared to competitors’ wooden front bulkheads and plywood—all in a single, solid, inseparable assembly is pulled into a vacuum chamber to bond the pieces together as the adhesive cures. The result is a wall that possesses each of the different qualities of its ingredients—the strength of steel, the insulative quality of the EPS block foam, the rigidity of the ¼” mahogany plywood—all in a single, solid, inseparable component.

SYSTEM BUILDS ALL OF THE STRENGTH NECESSARY TO SUPPORT THE COACH INTO THE CHASSIS SYSTEM ITSELF—BELOW THE FLOOR LINE AND BELOW THE SLIDE-OUTS.

National RV uses an advanced vacuum lamination process in the construction of all coach body components. A layer of specially formulated industrial adhesive is carefully applied between each layer of the component. Once joined, the entire assembly is pulled into a vacuum chamber to bond the pieces together as the adhesive cures. The result is a wall that possesses each of the different qualities of its ingredients—the strength of steel, the insulative quality of the EPS block foam, the rigidity of the ¼” mahogany plywood—all in a single, solid, inseparable component.

Engineered for Multiple Slideouts
The Duraframe® Chassis System is specifically engineered to provide the strength that today’s multiple slide-out motorhomes need. Other manufacturers rely on the coach sidewalls to absorb some of the stresses of carrying the coach’s weight. But slide-outs blow huge holes in that strategy. That’s why the Duraframe Chassis System builds all of the strength necessary to support the coach into the chassis system itself—below the floor line and below the slide-outs.

JOIN THE FAMILY

When you buy a Dolphin motorhome, you become a member of the National RV family. Through a wide variety of factory service and support benefits for owners to manufacturer support of local clubs and rallies—as well as the Islanders National RV Owners Club—National RV strives to foster a close, mutually beneficial relationship with the owners of the company’s products.

FACTORY TOUR CONTINUED

QUALITY ASSURANCE
Of course, no National RV hits the road without first undergoing a thorough battery of quality checks. In the rain test booth, every coach is subjected to a simulated rainstorm—with all of the water cascading down the roof, rear slides, and windows. Over the next two days, the coach is subjected to a variety of road tests to check the suspension and operation. Finally, quality auditors test every component of the coach for proper operation. After a thorough cleaning, the interior fabrics—carpets, seats and furniture—are covered in protective plastic to ensure delivery of a clean, tidy motorhome.

READY FOR DELIVERY!

FACTORY SERVICE
In addition to hundreds of trained service technicians at its dealers throughout North America, National RV operates two large Factory Service and Parts Distribution Centers, one on each coast. This ensures that the expertise and parts to fix any problem are readily available either at your local dealer or one of these centers.

ROADSIDE ASSISTANCE
National RV provides a complimentary first year of coverage by Coach Net®, America’s leading provider of 24-hour emergency roadside assistance. In addition to emergency towing, Coach Net® provides free trip planning, service scheduling assistance, travel maps, coverage for your towed vehicle and much more.

Great Warranty
National RV stands behind the quality components and workmanship built into every Dolphin motorhome with one of America’s best RV warranties—including a 3 year/unlimited miles warranty against structural defects to the coach body and Duraframe® Chassis System. National RV covers all other factory installed components for a period of one year from the date of purchase.

ISLANDERS GETAWAYS
GetAways are the highlight of National RV Owners Club membership. These well-organized events are a great opportunity to meet other RV enthusiasts. GetAways are held throughout the year at interesting locations across the United States. Quality entertainment, great food and fun activities are all part of every GetAway. You may also seek the assistance of National RV service technicians, tour the latest National RV products and hear the latest news from company officers.

National RV covers all other factory installed components for a period of one year from the date of purchase.

Islanders Getaways
GetAways are the highlight of National RV Owners Club membership. These well-organized events are a great opportunity to meet other RV enthusiasts. GetAways are held throughout the year at interesting locations across the United States. Quality entertainment, great food and fun activities are all part of every GetAway. You may also seek the assistance of National RV service technicians, tour the latest National RV products and hear the latest news from company officers.

Regional Clubs
Many regional clubs cater to National RV owners in their local areas. National RV is committed to supporting these clubs through the Islander Newspaper, support for local rallies and events, and close cooperation through the GetAways and the National RV Owners Club. To find a National RV affiliated regional owners club near you, please visit the National RV website at:

www.nationalrv.com

provided for free for the first year by National RV. Inside you’ll find:

NOTE: For Dolphin, all exterior graphics, interior decors and cabinetry woods are available independent of one another, and may be mixed to suit any taste. For Dolphin LX, either the Sterling or Heritage Edition packages determines the interior decor, exterior color and optional cabinetry woods, which can not be mixed between packages.

Sterling Package also includes stainless steel appliances, cabinetry hardware, shower surround and other fixtures. See Specification Sheet for details.
